

AIR ENERGY Servant Sensor

Technology
Few Ideas Make the change

It's time for smart living

CONSUME WISELY

With our main goal being energy management and savings for our customers, we attempt to design devices with the lowest energy consumption and the best smart performance. AIR Energy Servant sensor 10 Functions is another TIS product merged from the latest technology and designers' integrity.

AIR Energy Servant 10 Functions is a ceiling sensor which has a nice design including PIR Motion sensor, Light harvest sensor, Relays outputs, Digital input, Temperature sensor, Infrared emitter, and 32 logic and timers' lines with great capabilities to ensure the most efficient energy use; i.e., 60% total saving which equals to 240\$ per year.

But how?

Here are a number of ways in which this sensor reduces energy consumption. This smart solution turns off the AC if there is a door or window open for 1 minute or if there is no occupancy in room for 10 hours. Moreover, if its light sensor detects enough sun light, it automatically turns off the lights.

Once you install it, you can control it with related IOS and Android apps. It has an inbuilt WIFI module which makes it possible to manage lights, curtains, and room temperature from anywhere around the world. Even when you are spending quality time at beach, you don't have to worry about your home. Control everything while enjoying your cold drink.

One of its capabilities is a report of current electricity consumption. This report is also available on daily, monthly and yearly basis.

Due to its IR send/receive functionality, Energy Servant 10 Functions sensor is capable of working with remote control. So when you are deciding to add this technological trophy to your house, provide another one for elderly people in your family. Further, you do not have to go through many button pushing process to set your favorite home theatre atmosphere. With Energy Servant 10 Functions sensor's high performance, this setting is only a matter of few seconds.

It also has security functions; detects motions, alerts fire, and alarms if a door or window is open.

Another feature of Energy Servant 10 Functions is its integration with Amazon Alexa voice service. This feature is valuable for people with mobility impairment. We are delighted to enable everyone to enjoy our smart products.

This affordable smart package easily adapts to your life style. You will be surprised by its numerous functions in only one single smart device.

A graphic composition for a TIS Smart Home advertisement. At the top center is a white box with a red top section labeled "TIS Smart Home". Below the box is a white dome-shaped camera lens. To the right of the camera is a black circular device with a white label that reads "TIS Energy Servant 10P" and includes a barcode and "SN:11111111". Surrounding these items are several circular icons: a key, a lightning bolt, a location pin, a gear, a sun, a padlock, a shield, a Wi-Fi symbol, a musical note, a film strip, and a faucet. The background is a dark grey with concentric dashed white circles and a light grey background with faint icons of a house, a leaf, and a sun. The TIS logo is in the bottom right corner.
